

CAREPLUS™ ASSET TRACKING

CarePlus™ Asset Tracking is a clinical-grade RTLS solution, designed to help manage the location of important and costly equipment. RTLS technology fixes time wasted searching for lost equipment, improves wait times for patients with resource optimisation, enables faster bed turnaround, facilitates quick maintenance and testing, and generates significant returns on investment. Superior, clinical-grade room-accuracy location management is provided for chosen assets, such as IV pumps, respiratory machines, patient monitors, mobile x-ray units, ECG monitors, laptops, ultrasound units, wheelchairs, and more. Dual Radio Frequency (RF) and Infra-Red (IR) technology is utilised to narrow down assets to an exact room; for example, room 213 or operating theatre 7. As soon as movement is detected, the tags placed on the chosen asset is activated. Transmitters and receivers track the items, alerting Nursing stations to the new resting location. As a by-product, CarePlus™ Asset Tracking fully enables CarePlus™ Mobile Staff Duress via the same technology. Other substantial benefits include greater workflow efficiency and increased quality patient care. Asset monitoring is ideal for all healthcare facilities, including hospital and emergency departments, aged care and dementia units, mental health facilities, drug and alcohol units and day surgery. CarePlus™ Asset Tracking delivers clinical-grade monitoring for expensive assets to improve the functionality of every healthcare environment.

UK – Europe office:

Unit 9, Miller Court, 43 Station Road
Kenilworth, Warwickshire,
CV81JD, United Kingdom

Main Benefits:

- Clinical-grade room accuracy for time optimisation.
- Robust, tamper-proof tags prevent inventory shrinkage and theft.
- Increases time spent with patients, staff workflow and productivity.
- Scalable and flexible to suit any facility or clinic size.
- Reduces capital expenditure.
- Improves overall staff and patient satisfaction.
- Reduce time wastage looking for equipment: find, fetch, retrieve.

Features:

- Auto-sensing via RTLS: no effort for staff to track equipment required.
- Recorded location after asset stops moving.
- A full asset data base is available with just one click of your chosen item, such as the asset type, name, model, serial number and date of calibration.
- Archives the location of all equipment for future analysis.
- Stand-alone product and/or can be incorporated with all CarePlus™ Nurse Call devices.
- Utilises the same technology as CarePlus™ Mobile Staff Duress.
- Battery life: 5-years.
